EDUCATION

- International Institute of Information Technology (IIIT) Naya Raipur** Naya Raipur, India
B.Tech in Computer Science & Engineering (CGPA: 7.82) *July 2024 – May 2028*
Relevant Coursework: DSA, DBMS, Probability, Linear Algebra, Optimization.

SKILLS

Languages: Python, C++, C, SQL, JavaScript, HTML, CSS
Machine Learning: TensorFlow, Keras, OpenCV, Scikit-Learn, Pandas, NumPy, Matplotlib
Web Development: HTML, CSS, React.js, Flask, REST APIs, Postman, MySQL
Tools & Platforms: Git, GitHub, Linux, VS Code, Render/AWS

PROJECTS

- CSC Sarthi – AI-Powered Pre-Submission Assistant** | *Python, Django, Scikit-learn, OCR, Render* [\[GitHub\]](#)
 - Built an **AI-powered pre-submission validation platform** for **30+ government services**, performing real-time form validation and rejection-risk prediction.
 - Developed a **machine learning risk prediction engine** using service schema features, achieving **~87% validation accuracy** with **field-level explainability**.
 - Engineered an **OCR-based document verification pipeline** to extract Name, ID, and DOB, detecting **3+ types of mismatches** by cross-validating documents against form inputs.
 - Designed a **WhatsApp chatbot workflow** for remote document pre-verification and built a **Django analytics dashboard** visualizing the **top 5 rejection causes** across **30+ districts**.
- LiteLLM – LLM Gateway & Access Management Platform** | *React, Node.js, PostgreSQL, MongoDB, Redis, Stripe* [\[GitHub\]](#)
 - Built a **micro-subscription SaaS platform** providing short-term access to premium LLMs such as Claude Sonnet and GPT-4o, eliminating recurring **\$20/month** subscriptions.
 - Engineered a **Redis-based hybrid rate limiter** using TTL windows and a hidden **~100K token ceiling** to prevent API billing abuse.
 - Designed a **three-tier storage architecture** using PostgreSQL, MongoDB, and S3/Cloudflare R2, with **Stripe Webhooks** for atomic pass provisioning.
 - Integrated **prompt caching** and **Server-Sent Events (SSE)** to reduce LLM inference costs while streaming real-time token responses.
- Cross-Age Face Verification System** | *Python, TensorFlow, DeepFace, Flask* [\[GitHub\]](#)
 - Implemented a **FaceNet512-based cross-age face verification** system on the FG-NET dataset, achieving **93.6% ROC-AUC** and **85.3% accuracy**.
 - Deployed a **Flask web application** serving the TensorFlow model for real-time image uploads and identity matching.

OPEN SOURCE

- Onyx** | *Open Source Contributor (Remote)* Jul 2026
 - Engineered a GitLab connector branch override by extending React/TypeScript configuration interfaces and threading target references through **python-gitlab** API retrieval methods; implemented robust **GitlabGetError** exception handling and authored unit tests validating Git blob URL construction.
- Tenstorrent tt-metal** | *Open Source Contributor (Remote)* Jun 2026
 - Merged contribution modernizing kernel-level C/C++ type declarations across Quasar and Wormhole components; collaborated with maintainers through issue discussions and code review.

ACHIEVEMENTS

- Winner, Hackathon** Mar 2026
E-Summit 2026 (Organized by E-Cell, IIIT NR)
 - Developed and pitched CSC Sarthi, an AI-powered pre-submission assistant for government services, successfully demonstrating real-time form validation and document verification to the judging panel.
- Winner, Case Study Competition** Feb 2026
Xcelerate 2026 (Organized by Money Matters, IIIT NR)
 - Proposed a strategic "Three pillars solution" for a Central India Manufacturing Hub, successfully defending the proposal and handling counter-questions from the judging panel.

VOLUNTEER EXPERIENCE

- Head of Art Society (Indradhanush)** IIIT Naya Raipur
Led a team of 50 students in organizing campus-wide cultural events and workshops. *Aug 2025 – July 2026*
